SUMMARY

Full-Stack Developer specializing in scalable enterprise applications — ERP, HRMS, CRM, and Accounting systems — for UAE and Gulf region businesses. Proficient in React, Vue 3, FastAPI, Node.js, and Laravel, with a strong focus on translating complex client requirements into high-performance, compliance-ready business software. Passionate about driving business efficiency through cutting-edge technologies, custom system design, and seamless database architectures.

EXPERIENCE

Software Developer

Afamia

June 2025 - Present, Dubai, UAE

- Architected and deployed full-scale Accounting ERPs custom-tailored for product-based, service-based, and specialized garage businesses, incorporating complete accounts payable/receivable (AP/AR), multi-currency (AED) support, and built-in UAE VAT/tax compliance reporting (afamia.afamiasoft.com).
- Designed and built a comprehensive HRMS platform from the ground up, automating employee directories, attendance tracking, absence request approval workflows, performance metrics, and complex payroll/salary calculations (hrbmc.afamiasoft.com).
- Developed a dynamic, high-performance Customer Relationship Management (CRM) platform featuring interactive Kanban-style sales pipelines, contact management, deal-tracking, activity logs, and predictive sales forecasting.

Full Stack Developer

Nexeor

July 2024 - June 2025, Dubai, UAE

- Designed and engineered a centralized ERP system that automates the full order-to-delivery lifecycle, reducing order processing delays and minimizing operational overhead.
- Developed high-concurrency, secure RESTful APIs using **FastAPI** and **Python** to manage complex business logic, transactional operations, and multi-user roles.
- Built a real-time inventory management system with automated invoicing, live stock monitoring, purchase order (PO) generation, and a centralized customer-vendor database.

Full Stack Web Developer

Technocare

August 2023 - July 2024, Doha, Qatar

- Designed and developed customized, high-performance **WordPress themes and plugins** using PHP, modern CMS architectures, and Gutenberg/element-driven blocks, giving clients intuitive content management controls.
- Built and customized secure, scalable **WooCommerce e-commerce platforms**, incorporating secure payment gateways, checkout optimizations, and custom product configuration tools.
- Optimized web performance by refactoring legacy code, utilizing database indexing, minifying assets, and implementing advanced caching strategies, significantly boosting page speed scores and Core Web Vitals.

EDUCATION

Bachelor of Computer Science

University of Calicut • Malappuram • 2022

SKILLS

- **Languages:** JavaScript (ES6+), Python, PHP, HTML5, CSS3
- **Frontend Technologies:** React, Vue 3, Nuxt, Pinia, Tailwind CSS, jQuery, AJAX, Vuetify, Framer Motion (Micro-animations)
- **Backend Frameworks:** Node.js, Express.js, FastAPI, Django, Laravel
- **Databases:** PostgreSQL, MongoDB
- **Developer Tools & DevOps:** Git, Docker, Vite, Postman, CI/CD Pipelines
- **Domain Expertise (System & Business Specialities)**
